SECTION 1

Client Overview

Mendel is the all-in-one corporate spend management platform built for enterprise companies in Latin America. Mendel combines corporate cards, expense reports, reimbursements, invoice payments, business travel, real-time policy controls, ERP integrations, and an AI layer into one platform for CFOs and finance teams. The product is sold as enterprise SaaS, customised by modules, scale, geography, and implementation complexity.

Company	Mendel
Website	mendel.com
Category	Enterprise spend management platform (LatAm)
Core markets	Mexico (90% growth focus), Argentina, Chile – expansion across Spanish-speaking LatAm
Customer base	1,000+ large enterprises (KPMG, OXXO/FEMSA, Walmart, Suzuki, Viva Aerobus, +others)
Avg. ACV	USD \$15K – \$20K per year (\$700 – \$1,800 / month)
Sales cycle	3 – 6 months (some enterprise deals 12+ months)
LTV	Effectively infinite – near-zero churn
Conversion	Inbound 18%, Outbound 12%, SDR prospecting 7%, WhatsApp chat 8%, Global 17%
CRM	HubSpot
Outbound stack	Currently: agency (blackbox) + freelancer on SmartLead. New: Outreach Magic + EmailBison + Heyreach + Zapmail infra
Q2-2026 goal	100+ qualified sales meetings per quarter with target ICPs

Product Modules

1. Corporate Cards + Smart Spend Controls

Issues physical and virtual corporate cards for any employee, team, or BU. The differentiator is a real-time policy engine: rules by employee, role, business unit, merchant category, country, amount, channel, day/time, expense type, budget owner, cost centre, or project. Finance approves, blocks, or flags transactions BEFORE they happen – not at month-end.

2. Expense Management

Full expense-report workflow automation. Employees submit receipts, invoices, and reports inside the platform. The system classifies expenses, matches receipts to card transactions, applies policy, and prepares everything for accounting. Replaces SAP Concur + Excel + email + AMEX.

3. Mendel Viajes (Corporate Travel)

Built-in OBT certified with Sabre and Amadeus. Partnered with BCD Travel, Altour, Cocha, Travel Services, and Furlong. Flights, hotels, cars, policy enforcement, multi-level approvals, virtual-card payments, and expense reconciliation – all inside the same platform.

4. ERP Integrations & Finance Automation

Direct posting of card transactions, expense reports, invoices, reimbursements, and travel data into the customer's ERP. Automates classification, cost centre allocation, tax docs, approvals, month-end reconciliation, ERP posting, and audit trails. Critical for SAP S/4HANA, Oracle, and Netsuite shops.

5. Invoice Retrieval / Recupero de Facturas (Mexico only)

Detects card transactions missing a CFDI, automates retrieval from merchants, validates against the SAT, and matches the invoice back to the original card transaction. Documented +30% lift in deductibility. This is Mendel's most defensible module against global competitors.

6. AI Layer

Embedded across the platform: anomaly and fraud detection, receipt/invoice intelligence (OCR + classification), WhatsApp receipt capture with auto-matching, AI-assisted travel booking inside policy, automated cost centre suggestions, and policy-enforcement copilots for finance.

Unique Value Proposition & Positioning

UVP – As Stated by Mendel

"Mendel is the all-in-one spend management platform for enterprise companies in Latin America – combining corporate cards, expense reports, reimbursements, invoice payments, travel, real-time policy controls, ERP integrations, and AI into one platform. We help CFOs control company spend in real time, close the month faster, reduce fraud and leakage, and recover more deductible invoices."

UVP – Refined for Cold Outbound

The one platform LatAm CFOs use to control every peso in real time – cards, expenses, reimbursements, invoice payments, and travel in one system, integrated with the ERP, with automatic CFDI recovery in Mexico.

Three Specific Differentiators

1. One platform across all six spend modules

Cards + Expenses + Reimbursements + Invoice Payments + Travel + ERP, plus an AI layer. SAP Concur + AMEX is fragmented into two systems and a card brand. Clara stops at cards + expenses for SMB / mid-market. Edenred is prepaid HR benefits, not enterprise spend. No competitor in LatAm currently offers all six modules in one platform with an enterprise feature set.

2. A real-time policy engine that fires BEFORE the transaction

Mendel does not just record what was spent – it can approve, block, or flag a transaction the moment it is attempted, based on employee, role, BU, merchant, amount, category, day/time, country, or channel. SAP Concur is post-hoc reconciliation. Bank corporate cards expose only credit limits, not policy. Mendel turns the corporate card into a programmable enforcement layer.

3. CFDI invoice recovery built for Mexican tax law

Automated retrieval of missing CFDIs from merchants, SAT validation, and reconciliation to the original card charge. Documented +30% lift in deductibility for Mexican customers. SAP Concur and AMEX do not solve this; Clara and Edenred do not match the depth. This single module is often the #1 ROI driver for Mexican CFOs.

Lead Magnets / Content Assets Available for Outreach

- **Mendel vs Concur** benchmark deck (PDF) – head-to-head on cards, expenses, travel, pricing.
- **Mendel vs Edenred** one-pager (PDF) – full module / functionality comparison.
- **Mendel vs T&E** one-pager (PDF) – generic T&E; vendors compared to Mendel.
- **Invoice Recovery** one-pager – step-by-step CFDI retrieval flow with documented +30% deductibility uplift.
- **Mendel Viajes pitch deck** – corporate travel module standalone.
- **Mendel Expenses + Viajes 2026 full deck** – master sales deck.
- Customer success videos and case studies (mendel.com/blog).

- Prior podcast archive (CForward, paused 2023) – reusable for thought leadership clips.

Positioning Statement

For LatAm CFOs and finance leaders managing complex, multi-entity, multi-country spend, Mendel is the all-in-one spend management platform that replaces the fragmented stack of SAP Concur + AMEX + Excel + local invoice tools – giving them a real-time policy engine across cards, expenses, travel, reimbursements, and invoice payments, fully integrated with their ERP and tuned for Mexican CFDI compliance.

Social Proof & Case Studies

Mendel has built a strong reference base in LatAm enterprise. The combination of household name logos, quantified ROI metrics, and enterprise grade certifications gives outbound campaigns a high trust footing with CFOs from day one.

Customer Footprint

Logos to cite	KPMG, OXXO, FEMSA, Walmart, Suzuki, Viva Aerobus, +1,000 large enterprises
Geo coverage	Mexico (primary), Argentina, Colombia, Chile
Card issuance	Live in Argentina and Mexico
Industry breadth	Retail, CPG, professional services, energy, telecom, media, logistics, manufacturing, large tech enabled enterprises

Quantified Outcomes (Mendel OnePager Metrics)

Admin hours saved	150+ hours of administrative tasks saved per month
Non deductible reduction	+20% reduction in non deductible expenses
Invoice reconciliation	30+ hours of invoice reconciliation saved per month
Admin cost savings	+US\$20K saved in administrative expenses
Deductibility lift	+30% increase in deductibility (CFDI recovery)
Real time audit	100% of expenses audited in real time
Per employee uplift	6+ hours of productivity per employee per month
Month end close	Same day close (vs. prior 5+ days)

Trust & Compliance

- SOC 2 Type II
- ISO 27001
- PCI DSS
- CNBV operational security standards (Mexico)
- AWS hosting, end to end encryption, public Trust Center

Travel Infrastructure Partners (Mendel Viajes)

- Sabre + Amadeus GDS certification
- BCD Travel, Altour, Cocha, Travel Services, Furlong (TMC partners)

Case Study Gap to Address

Mendel has Success Story videos and named logos but few public, vertical-specific case studies with named buyer + named outcome metrics. **Recommendation:** for the four priority verticals below, request from Alan one anonymised mini-case (Challenge → Solution → Result with numbers) so cold copy can lead with concrete proof per industry, not just logos.

Target Verticals

Mendel positions itself as sector-agnostic, but the data points to five verticals where the combination of distributed teams, complex spend, ERP density, and Mexican CFDI exposure makes the value proposition strongest. Verticals are ranked below by current evidence (logos, client-confirmed use cases, conversion data) rather than market size alone.

#1 Retail & Consumer Goods (Mexico-centric)

Why this vertical	Highest evidence vertical. Mendel already serves OXXO/FEMSA and Walmart – two of the largest retail/CPG operations in Mexico. The combination of distributed store networks, regional managers, supplier ecosystems, and very high CFDI volume makes this the densest value pocket Mendel can mine.
Size sweet spot	500+ employees, 50+ store/distribution points, USD \$50M+ annual operational spend
Vertical pain	Tracking spend across hundreds of locations and store managers; recovering CFDIs from a long tail of suppliers; petty-cash chaos at store level; reconciling supplier payments with multi-entity ERP; T&E; for regional managers covering large territories.
Value angle	A single platform that gives the CFO real-time visibility into every store's spend, enforces policy at the merchant-category level, automates CFDI capture from each ticket via WhatsApp, and posts everything cleanly into SAP/Oracle.
Buying signals	Hiring Controller / Finance Director / "Gerente de Tesoreria"; new store openings or DC launches; SAP/Oracle ERP migration; references to SAT CFDI 4.0 compliance pain; agreements with new suppliers/distributors.
Confidence	Client-confirmed (active customers, named logos)

#2 Logistics & Transportation

Why this vertical	Client surfaced this vertical specifically: "a large logistics operator can use our card controls to manage their fleets (fuel, repairs, etc)." Viva Aerobus is an existing logo. The fleet/per-diem use case gives Mendel a sharper angle than generic spend management.
Size sweet spot	200+ vehicles in road logistics, OR 10+ aircraft in aviation, OR 50+ drivers
Vertical pain	Reconciling fuel and repair spend across hundreds of vehicles; controlling driver per-diem and tolls; route-by-route cost allocation; fraud risk on fleet cards; CFDI recovery from gas stations and repair shops.
Value angle	Granular per-vehicle / per-driver / per-route policy rules, real-time fraud blocks, automatic CFDI retrieval from fuel and repair merchants, and ERP-ready cost-centre allocation by route.
Buying signals	Fleet expansion announcements; new route launches; hiring Fleet Manager / Operations Director; switching off legacy fuel-card programs (Edenred Fleet, e.g.); nearshoring-driven trucking buildouts.
Confidence	Client-confirmed use case + Viva Aerobus logo

#3 Manufacturing & Industrial

Why this vertical	High vendor invoicing density, multi-plant operations, complex ERP environments, and Mexico's nearshoring boom make manufacturing a structural fit. Vendor invoice payments + ERP integration are core Mendel modules and the natural buying centre for a finance VP in a multi-plant operation.
Size sweet spot	1,000+ employees, 2+ plants in Mexico/LatAm, multi-entity finance structure
Vertical pain	Vendor invoice payment cycles; cost-centre allocation across plants; multi-plant T&E; governance; long ERP reconciliation cycles in SAP S/4HANA; CFDI compliance across hundreds of suppliers.
Value angle	A single posting layer into the ERP that classifies, allocates, and reconciles spend by plant and cost centre, with real-time invoice approval workflows.
Buying signals	ERP migration projects (SAP S/4HANA, Oracle Cloud, Netsuite); nearshoring announcements; new plant openings; hiring "Procure-to-Pay Manager" or "Cost Controller"; M&A; with a target in MX/LatAm.
Confidence	Client-confirmed sector fit

#4 Pharmaceutical & Healthcare

Why this vertical	Client surfaced this specifically: "a pharmaceutical company can give their sales team a Mendel card for when they travel to congresses, conferences, inviting doctors to dine out". Compliance-sensitive T&E; and HCP-entertainment policy is a sharply differentiated angle for the policy engine.
Size sweet spot	100+ medical reps in MX/LatAm, OR 500+ employees in healthcare services
Vertical pain	Compliance-sensitive T&E; (anti-bribery, HCP transparency); rep dining and gift policy enforcement; congress/conference travel approvals; reimbursing reps weeks after the fact creating cash-flow friction; CFDI capture from dozens of restaurants and hotels per rep per month.
Value angle	Pre-transaction policy enforcement on HCP-entertainment limits, automatic itemised reporting for compliance, and CFDI recovery for every dinner and hotel night.
Buying signals	Hiring Compliance Officer or Medical Affairs Director; congress sponsorships; medical liaison hires; product launches in MX/LatAm; transparency-reporting season.
Confidence	Client-confirmed use case

#5 Professional Services (Consulting / Audit / Legal)

Why this vertical	KPMG is an existing logo. Heavy partner/manager travel, billable client expenses, and multi-country engagements make Mendel an obvious fit. Travel Manager persona becomes an additional buying centre via Mendel Viajes.
Size sweet spot	500+ consultants/auditors/lawyers, regional client travel base
Vertical pain	Capturing billable expenses for client invoicing; partner-manager-staff approval chains; currency complexity in multi-country engagements; distinguishing reimbursable vs. non-reimbursable expenses; lost CFDIs that erode the firm's own deductibility.
Value angle	Tag-by-engagement expense capture, multi-currency, multi-country approval flows, virtual cards per engagement, and ERP-ready data for billing.
Buying signals	New office openings; large engagement announcements; hiring Engagement Operations Manager / Travel Manager; partner promotions; nearshoring-advisory boom in MX.

Confidence	Client■confirmed (KPMG logo)
------------	------------------------------

SECTION 5

Ideal Customer Profiles & Personas

The CFO is the consistent primary buyer across every vertical. The Controller is the operational co-decider in nearly every deal. Beyond those two, each vertical surfaces a third persona who sponsors specific modules – Shared Services for retail, Fleet Operations for logistics, Procurement for manufacturing, Compliance for pharma, Travel Manager for professional services. All targeting filters should require a Mexican (or LatAm) entity for relevance.

CFO / Director de Finanzas

Job titles	"Chief Financial Officer", "CFO", "Director de Finanzas", "Director Financiero", "VP Finance LatAm", "Finance Director Mexico"
Where they exist	All verticals; companies 500+ employees in Mexico / LatAm
Daily reality	Owns month-end close, cash management, board reporting, and audit. Spends days reconciling spend that lives across AMEX statements, Concur, ERP, supplier portals, and Excel. Carries the blame for fraud or audit findings.
Metrics they own	Days to close, audit findings, deductible expense %, EBITDA, days payable outstanding, fraud incidents
Biggest frustration	Detecting policy violations and fraud only at month-end; chasing CFDIs after the fact; explaining variances to the board for spend they have no real-time view of.
Budget authority	Owns budget. Final yes/no on enterprise SaaS. Often signs alongside CEO/Audit Committee for >\$50K ACV.
■ Target when	Recently appointed (90-day window); LatAm regional CFO with multi-country scope; quoted in press about "controls" or "modernisation"; company in audit/compliance review.
■ Skip when	Pure US/EU CFO with no LatAm responsibility; CFO at <100-employee company; CFO at existing Mendel customer.

Controller / Contralor

Job titles	"Controller", "Contralor", "Corporate Controller", "Group Controller", "Finance Operations Director"
Where they exist	All verticals; usually one per legal entity in companies 500+ employees
Daily reality	Operational owner of the close cycle and policy enforcement. Manages the Concur/AMEX/Excel stack day-to-day. Coordinates with auditors, tax, and ERP teams.
Metrics they own	Close cycle days, % expenses with valid CFDI, exception count, ERP posting accuracy, audit prep hours
Biggest frustration	Manually chasing receipts and invoices from employees; reconciling card statements line-by-line; building the same exception report every month.
Budget authority	Heavy influence; rarely the sole approver. Champions the procurement evaluation.
■ Target when	Posting jobs for "AP analyst", "expense analyst", "month-end close associate"; new ERP module rollouts; hiring around year-end audit.

■ Skip when	Controller at company already on Mendel; Controller in pure services single country firm with <100 employees.
-------------	---

Procurement / Purchasing Director

Job titles	"Director of Procurement", "Director de Compras", "Procurement Manager", "Procure to Pay Manager", "Sourcing Director"
Where they exist	Manufacturing, Retail/CPG, Logistics, Healthcare; 500+ employees with structured P2P
Daily reality	Owns vendor onboarding, PO issuance, and the AP side workflow. Sits between Finance and the business units. Often leads RFPs for tools like Mendel.
Metrics they own	Cycle time PO to payment, vendor compliance %, contract savings, supplier disputes
Biggest frustration	Vendor invoices in 8 different formats; mismatch between PO, GR, and invoice; manual three way matching; supplier complaints about late payments.
Budget authority	Co approver on procurement led RFPs; champions the integration requirements.
■ Target when	Active P2P RFP; new ERP rollout; supplier portal complaints; hiring AP/sourcing roles.
■ Skip when	Procurement role with no link to expense or invoice payments; indirect only purchasing.

Shared Services / Finance Operations Manager (Retail/CPG)

Job titles	"Shared Services Manager", "Finance Operations Manager", "Gerente de Servicios Compartidos", "Head of Finance Shared Services LatAm"
Where they exist	Retail / CPG companies running shared service centres in MX/LatAm
Daily reality	Runs the AP/AR/Expense factory for hundreds or thousands of stores. Daily user of Concur or Excel. Owns the volume – thousands of expense lines per month.
Metrics they own	Lines processed per FTE, exception rate, CFDI capture rate per region, on time payment %
Biggest frustration	Processing 10K+ low value retail tickets per month, most without a CFDI; chasing store managers for receipts; manual classification by cost centre.
Budget authority	Heavy operational influence; champions automation cases.
■ Target when	New shared service centre opening; automation initiatives announced; hiring "RPA / automation lead".
■ Skip when	Shared services at a non retail company.

Fleet / Operations Director (Logistics)

Job titles	"Fleet Manager", "Director de Operaciones", "Operations Director", "Logistics Operations Manager", "Director de Flota"
Where they exist	Trucking, courier, last mile, aviation; 200+ vehicles or 10+ aircraft
Daily reality	Manages fuel cards, repair vendors, driver per diems, tolls, and route economics. Owns the cost line that the CFO sees as the biggest variable expense.
Metrics they own	Cost per km, fuel card fraud rate, vehicle uptime, driver per diem variance

Biggest frustration	Drivers using fuel cards off route; repair invoices without CFDI; manual reconciliation of fuel cards against route plans.
Budget authority	Sponsors the operational case; co-decides with CFO.
Target when	Fleet expansion; new route launches; switching from legacy fuel card programs; nearshoring trucking buildouts.
Skip when	Fleet roles in companies with <50 vehicles.

Compliance / Medical Affairs Director (Pharma)

Job titles	"Compliance Officer", "Medical Affairs Director", "Director de Cumplimiento", "Ethics & Compliance Lead LatAm"
Where they exist	Pharma, medical devices, healthcare services in MX/LatAm
Daily reality	Owns transparency reporting on HCP interactions, gift/dining limits, and audit response. Often blocked from real-time data by the rep expense reimbursement workflow.
Metrics they own	Transparency report completeness, policy breach incidents, audit findings, time to report
Biggest frustration	No real-time view of what reps are spending on HCPs; reimbursements arriving 30+ days after the dinner; impossible to enforce limits before the spend happens.
Budget authority	Strong influence on policy module + pre-transaction enforcement features.
Target when	Transparency reporting season; recent audit; new product launch with field force expansion; HCP incident press.
Skip when	Compliance roles in industries with no HCP equivalent risk.

Travel Manager / Procurement Travel Lead (Professional Services + Pharma)

Job titles	"Travel Manager", "Corporate Travel Manager", "Director de Viajes", "Procurement Travel Lead", "Travel & Expense Manager"
Where they exist	Professional services (consulting, audit, legal), pharma, large enterprises with 500+ travellers
Daily reality	Owns the OBT/TMC relationship, travel policy, and traveller experience. Caught between cost pressure from Finance and convenience pressure from partners/ reps.
Metrics they own	Policy compliance %, average ticket cost, leakage rate (out of tool bookings), traveller NPS
Biggest frustration	Travellers booking outside the tool because the legacy OBT is slow; payment via personal card and reimbursement; no visibility on travel tied expenses (Uber, dinners, hotels) until weeks later.
Budget authority	Sole or co-decider on Mendel Viajes; brings Finance into the deal.
Target when	OBT contract renewals (typically 12–24 months); TMC rebid; complaints in employee surveys about travel tooling; new office or engagement openings.
Skip when	Travel managers at companies with <100 travellers; agencies acting as TMCs.

Sales Operations / Field Force Operations Director (Pharma)

Job titles	"Sales Operations Director", "Director de Ventas Field", "Field Force Operations Lead", "Commercial Excellence Director"
Where they exist	Pharma, medical devices with 100+ field reps
Daily reality	Equips and supports the rep force. Owns the rep expense workflow operationally even when Finance owns the policy. Blamed when reps complain or compliance breaks.
Metrics they own	Rep productivity, days to reimburse, compliance incident rate, rep churn
Biggest frustration	Reps fronting cash for HCP dinners and waiting weeks for reimbursement; expense reports eating selling time; compliance team blocking spend mid cycle.
Budget authority	Strong influence; co sponsor with Finance / Compliance.
Target when	Field force expansion; new product launch; rep retention initiatives; complaints in Glassdoor about expense reimbursements.
Skip when	Sales ops at companies with no field reimbursement workflow.

Engagement Operations Manager (Professional Services)

Job titles	"Engagement Operations Manager", "Engagement Manager Operations", "Practice Operations Director", "Resource & Operations Manager"
Where they exist	Big 4, top tier consulting, large law firms; 500+ billable staff
Daily reality	Owns engagement P&L; hygiene. Cares about billable expense capture, write offs, and clean cost by engagement reporting.
Metrics they own	Realisation rate, billable expense capture %, write off rate, days from spend to client invoice
Biggest frustration	Billable expenses not tagged correctly; write offs because the receipt is lost; engagement P&L; incomplete at month end.
Budget authority	Strong influence on engagement centric features (per engagement virtual cards, tagging, billable export).
Target when	New large engagements announced; partner promotions; engagement management software RFP; growth in advisory practice.
Skip when	Operations roles at firms with <500 billable staff.

Cost Controller / Plant Finance Manager (Manufacturing)

Job titles	"Cost Controller", "Plant Finance Manager", "Controller de Planta", "Finance Manager – Plant", "Manufacturing Finance Director"
Where they exist	Multi plant manufacturing in MX/LatAm; 1,000+ employees
Daily reality	Controls cost per plant; tracks variances against budget; owns vendor invoice flow at plant level. ERP heavy day.
Metrics they own	Cost variance vs. budget, vendor on time payment %, plant close days, CFDI capture by supplier
Biggest frustration	Vendor invoices arriving in fragmented formats; plant level CFDI gaps; differences between SAP postings and AMEX statements; T&E; for plant managers untracked.
Budget authority	Strong influence; champions the ERP integration story.

■ Target when	New plant openings; ERP module rollouts; cost saving initiatives; nearshoring growth at the plant level.
■ Skip when	Plant roles in single plant operations or non LatAm only.

SECTION 6

Pain to Value Mapping

Each pain below references a specific role, activity, or metric and maps to a Mendel module that delivers a quantifiable outcome – the foundation for every cold email hook.

CFO / Director de Finanzas

PAIN	Detecting policy violations and fraud only at month end, after the money is gone, because Concur posts after the fact and AMEX shows only a credit limit.
VALUE	Real time policy engine on the corporate card that approves, blocks, or flags transactions before they post, with rules per role, BU, merchant, amount, and country.
OUTCOME	From "find fraud at close" to "block fraud at swipe" – +20% reduction in non deductible/out of policy spend reported by Mendel customers.
PAIN	Month end close runs 5+ days because card transactions, Concur expenses, AMEX statements, and supplier invoices live in disconnected systems and none post cleanly to SAP/Oracle.
VALUE	A single platform that consolidates cards, expenses, reimbursements, invoice payments, and travel and posts directly to the ERP with pre classified cost centres.
OUTCOME	Same day month end close (vs. prior 5 days) with audit ready data already in the ERP.
PAIN	Mexican operations losing 20–30% of corporate spend to non deductibility because employees never recover CFDIs from Uber, OXXO, gas stations, restaurants, and small suppliers.
VALUE	Automated CFDI retrieval module that detects missing invoices, pulls them from merchant portals, validates against the SAT, and matches them to the original card transaction.
OUTCOME	+30% lift in deductible expenses, directly improving EBITDA and reducing audit risk.

Controller / Contralor

PAIN	Manually building the same exception report every month – transactions without CFDI, transactions out of policy, missing receipts, missing categorisation – across 4+ tools.
VALUE	Single dashboard with all exceptions auto classified, plus AI assisted receipt and invoice intelligence that flags missing/non compliant items as they happen.
OUTCOME	30+ hours of invoice reconciliation saved per month and 100% of expenses audited in real time.
PAIN	Chasing employees on Slack/email for receipts and invoices weeks after the fact, then cross matching them to AMEX statement lines.
VALUE	WhatsApp receipt capture: employees send a photo, AI extracts and matches automatically to the corresponding card transaction; finance gets a clean record without chasing.
OUTCOME	6+ hours of admin saved per employee per month and a measurable lift in receipt capture rate.
PAIN	Approval queues blocking the close because cost centre allocation is manual and ambiguous between business units.

VALUE	Mapping engine for cost centre + GL account + business unit, applied automatically by Mendel from the moment of the transaction.
OUTCOME	Approvals shifted from "manual triage at month-end" to "exception-only review during the month".

Shared Services / Finance Ops Manager (Retail/CPG)

PAIN	Processing 10,000+ low-value tickets per month from hundreds of stores, most missing CFDIs and improperly categorised by store managers using personal cards.
VALUE	Issue Mendel cards to every store manager with merchant-category limits and automatic CFDI recovery for every ticket.
OUTCOME	150+ admin hours saved per month and a measurable rise in CFDI capture across the store network.
PAIN	Reconciling supplier payments with multi-entity ERP across 5+ legal entities and 3 countries.
VALUE	Multi-entity, multi-currency platform with native ERP posting per entity.
OUTCOME	A single supplier payment workflow replacing the entity-by-entity manual loops.
PAIN	Petty cash chaos at store level – cash boxes, ad-hoc reimbursements, and missing receipts.
VALUE	Eliminating petty cash by issuing virtual or physical Mendel cards to store managers with policy controls.
OUTCOME	Petty-cash leakage eliminated and visibility on every peso spent in real time.

Fleet / Operations Director (Logistics)

PAIN	Drivers using fuel cards off-route or for repairs at non-approved vendors with no real-time block.
VALUE	Per-vehicle / per-driver / per-route policy rules that block off-policy fuel spend at the moment of swipe.
OUTCOME	Drop in fleet-card fraud incidents and a clean cost-per-km figure at the route level.
PAIN	Repair invoices arriving without CFDI, eroding deductibility on a major variable cost line.
VALUE	Automatic CFDI retrieval from repair vendors and gas stations with SAT validation.
OUTCOME	+30% deductibility lift on repair and fuel categories.
PAIN	Manual reconciliation of 100+ fuel-card lines per week against route plans, done in Excel by an analyst.
VALUE	Native cost-centre allocation by route, with ERP-ready data and AI categorisation.
OUTCOME	Analyst time freed up; reconciliation goes from days to minutes.

Compliance / Medical Affairs Director (Pharma)

PAIN	Reps reimbursed weeks after dining HCPs, with no real-time visibility on whether the spend respects HCP-interaction limits.
VALUE	Pre-transaction policy enforcement on HCP-entertainment categories, by rep, by region, by amount, with itemised reporting for transparency disclosures.
OUTCOME	Compliance breaches caught before they happen, transparency report assembled from clean source data.

PAIN	Transparency reports built manually from receipts and Excel, with gaps and disputes from rep memory.
VALUE	A single source of truth for every HCP-tied transaction, with structured data and CFDI documentation.
OUTCOME	Transparency report compilation reduced from weeks to days, audit-ready output.
PAIN	Reps using personal cards because corporate cards are reserved for senior leadership, creating cash-flow friction and reimbursement disputes.
VALUE	Issuing Mendel cards to every rep with built-in policy enforcement and automated reimbursement workflows.
OUTCOME	Eliminated personal-card friction and improved rep retention via better expense experience.

Travel Manager (Pro Services / Pharma)

PAIN	Travellers booking outside the legacy OBT because it is slow and bureaucratic, creating leakage on negotiated rates.
VALUE	Mendel Viajes built-in OBT (Sabre + Amadeus certified, BCD/Altour/Cocha/TS/Furlong partnered) with policy enforcement and AI-assisted search.
OUTCOME	Higher in-tool booking rate and cleaner negotiated-rate utilisation.
PAIN	Travellers paying with personal cards and waiting weeks for reimbursement, generating complaints in employee surveys.
VALUE	Virtual-card payment for every booking, with reconciliation back to the engagement / cost centre automatically.
OUTCOME	Reimbursement friction eliminated and traveller NPS lifted.
PAIN	No visibility on travel-tied expenses (Uber, dinners, hotels) until weeks after the trip, breaking budget tracking.
VALUE	Real-time spend on travel-associated expenses tied to the original trip ID, with policy enforcement.
OUTCOME	Trip-level P&L; available the day the trip ends.

Engagement Operations Manager (Pro Services)

PAIN	Billable expenses lost to write-offs because receipts disappear, miscategorised expenses, or missing CFDI.
VALUE	Per-engagement virtual cards, automatic tagging by engagement, and CFDI capture at swipe.
OUTCOME	Lower write-off rate and faster spend-to-client-invoice cycle.
PAIN	Engagement P&L; incomplete at month-end because expenses post late and unallocated.
VALUE	Real-time engagement-tagged spend with ERP posting cleanly mapped to the engagement code.
OUTCOME	Same-day engagement P&L; partners can run pricing decisions on live data.
PAIN	Multi-country engagements with currency conversion ambiguity and reconciliation pain.
VALUE	Native multi-currency, multi-country platform with consistent reporting standards.
OUTCOME	Multi-country engagements run as cleanly as single-country ones.

Cost Controller / Plant Finance Manager (Manufacturing)

PAIN	Vendor invoices arriving in 8 different formats with no automated three-way match against PO and goods receipt.
VALUE	Mendel's invoice payments + ERP integration combined with AI invoice intelligence to extract, classify, and three-way match automatically.
OUTCOME	Vendor invoice cycle compressed and supplier dispute volume reduced.
PAIN	Plant-level CFDI gaps eroding deductibility on indirect spend (MRO, services, T&E;).
VALUE	CFDI retrieval module covering plant-level merchants and services.
OUTCOME	+30% deductibility lift on indirect plant spend.
PAIN	SAP postings inconsistent with AMEX statements forcing manual reconciliation each close.
VALUE	Direct posting from Mendel into SAP S/4HANA with cost-centre and GL pre-classified.
OUTCOME	Reconciliation eliminated; single source of truth between transaction and ERP.

Signals, Triggers & Timing

Buying signals below are ranked from most to least actionable for outbound list building. Wherever possible, criteria are written as Apollo, LinkedIn Sales Navigator, or job board filters that the targeting engine can apply at scale.

Hiring Signals (Highest Actionability)

- New CFO / Controller / Finance Director appointed in the last 90 days with Mexico / LatAm responsibility.
- Active job posts with titles "ProcuretoPay Manager", "AP Manager", "Expense Analyst", "MonthEnd Close Lead", "Cost Controller", "Compliance Officer", "Travel Manager".
- Job descriptions mentioning "CFDI", "Concur", "AMEX corporate", "expense reconciliation", "monthend close", "policy enforcement", "vendor invoice management".
- Fieldforce expansion in pharma (medical reps, KAMs).
- Fleet manager / operations director hires in logistics.
- Engagement operations / travel manager hires in professional services.

Tech Stack & Vendor Signals

- **Replacement targets:** SAP Concur + AMEX corporate cards → Mendel positions as oneplatform consolidation with LatAm depth.
- **Upgrade target:** Clara on file → Mendel positions as the enterprise tier (deeper controls, ERP, travel, multi-country).
- **Modernisation target:** Edenred (prepaid) → Mendel positions as creditbased with full spend management.
- **Fit signal:** ERP = SAP S/4HANA, Oracle Cloud, Netsuite, Microsoft Dynamics F&O; – native integration story.
- Visible CFDI 4.0 compliance pain on LinkedIn / blog / job descriptions.

Company Event Triggers

- Funding rounds in Mexico / LatAm (Series B+).
- Multi-country expansion or new market entry into Mexico, Argentina, Chile.
- New plant, store, distribution centre, or office openings.
- M&A; activity with a target in Mexico / LatAm.
- IPO announcements driving control / audit modernisation.
- ERP migration or upgrade projects (SAP S/4HANA migrations are top-tier).
- Press coverage of fraud incidents, audit findings, or compliance failures.

Industry & Regulatory Triggers

- New SAT regulations or CFDI version updates in Mexico.
- Tax reform announcements affecting deductibility rules.
- Anti-bribery / transparency reporting cycles in pharma.
- Nearshoring announcements driving manufacturing buildouts in Mexico.

Stop Signals (Do NOT Contact)

- **Already a Mendel customer** – cross-check HubSpot before adding to outbound list.
- **Recently churned or cancelled** from any Mendel partner / agency outbound effort – use the agency "do not contact" list once shared.
- **Headquartered outside LatAm with no LatAm subsidiary** – even if logo is iconic.
- **Under 100 employees** – below ICP for enterprise spend.
- **Family-owned microbusinesses** with no finance team beyond the owner.
- **Existing Concur+AMEX bundle just renewed (within 6 months)** – timing wrong; recycle in 6–9 months.

SECTION 8

Cold Email Messaging Angles

Two to three messaging angles per priority vertical. Each angle is a self-contained hook → value lead → proof → problem solved → subject line direction. Subject lines respect Outreach Magic rules: max three words, lowercase except company / person names. Body length 50–80 words. Lead magnet = one of the public benchmark PDFs; offer = a 30-day spend leakage assessment for the prospect.

Retail / CPG – angle 1: store network spend visibility

Hook	reconciling 10,000+ store tickets per month with most missing a CFDI
Value Lead	one card per store manager with merchant category limits and automatic CFDI capture
Proof Point	OXXO/FEMSA and Walmart run their store networks on Mendel; +30% deductibility lift typical.
Problem Solved	manual reconciliation across hundreds of stores and a long supplier tail
Subject Direction	store ctrl

Retail / CPG – angle 2: same-day close

Hook	closing the books in 5+ days because card transactions, Concur, and AMEX statements never agree
Value Lead	a single platform that posts cards, expenses, invoices, reimbursements, and travel directly to your ERP
Proof Point	150+ admin hours saved per month, same-day month-end close.
Problem Solved	multi-system reconciliation chaos at close
Subject Direction	close cycle

Logistics – angle 1: fleet card fraud at swipe

Hook	fuel card fraud and off-route swipes detected only at month-end
Value Lead	per-driver / per-route real-time policy rules that block fraud at the moment of swipe
Proof Point	Viva Aerobus runs fleet-class card controls on Mendel.
Problem Solved	fuel and repair leakage on the largest variable cost line
Subject Direction	fleet swipe

Logistics – angle 2: deductibility on fuel and repairs

Hook	losing 20–30% of fleet spend to non-deductibility because gas stations and repair shops never deliver CFDis
Value Lead	automated CFDI retrieval from fuel + repair merchants with SAT validation
Proof Point	+30% deductibility lift on repair and fuel categories.
Problem Solved	invisible deductibility leakage hitting EBITDA
Subject Direction	fleet CFDI

Manufacturing – angle 1: ERP clean spend

Hook	SAP postings inconsistent with AMEX statements every close
Value Lead	direct posting from Mendel into SAP S/4HANA with cost centre and GL already classified
Proof Point	plants closing same day with audit ready data in ERP.
Problem Solved	multi plant reconciliation pain
Subject Direction	SAP posting

Manufacturing – angle 2: vendor invoice cycle

Hook	vendor invoices in eight different formats and three way matching by hand
Value Lead	AI invoice intelligence + ERP integration handling extraction, classification, and matching
Proof Point	30+ hours of invoice reconciliation saved per month.
Problem Solved	AP backlog and supplier disputes
Subject Direction	vendor cycle

Pharma – angle 1: HCP entertainment policy at swipe

Hook	reps dining HCPs without a real time check on policy limits
Value Lead	pre transaction enforcement of HCP entertainment limits, by rep, region, and amount
Proof Point	transparency reports built from clean source data, audit ready in days.
Problem Solved	compliance breaches found weeks after the dinner
Subject Direction	HCP policy

Pharma – angle 2: rep cash flow friction

Hook	reps fronting cash for HCP dinners and waiting weeks to be reimbursed
Value Lead	a Mendel card per rep with embedded policy and automatic reimbursement workflows
Proof Point	6+ hours saved per rep per month, complaints about reimbursement gone.
Problem Solved	rep retention pain and lost selling time
Subject Direction	rep cards

Pro Services – angle 1: billable expense capture

Hook	billable expenses written off because receipts disappear
Value Lead	per engagement virtual cards with automatic tagging and CFDI capture at swipe
Proof Point	engagement P&L; same day, less write off; KPMG already on Mendel.
Problem Solved	realisation rate eroded by lost expenses
Subject Direction	billable capture

Pro Services – angle 2: travel + expense in one

Hook	travellers booking outside the OBT and paying on personal cards
Value Lead	Mendel Viajes (Sabre + Amadeus certified, BCD/Altour partnered) plus Mendel cards in one platform
Proof Point	higher in-tool booking, traveller NPS lifted, trip-level P&L; same day.
Problem Solved	OBT leakage and traveller reimbursement friction
Subject Direction	travel ops

AI Identified Opportunities

Hypotheses surfaced by the model that the client has not explicitly validated. Treat as starting points for the next strategy call, not committed strategy.

Telecom (Mexican Carriers + Subsidiaries)

Mendel's assessment lists telecom as a fit sector but no anchor logo has been confirmed. Mexican carriers have very high T&E; (technician fleets), heavy supplier ecosystems, and SAT exposure – the same density that makes retail strong. Telmex / AT&T; / Megacable spinoffs and regional ISPs are likely high-fit accounts to test in a focused vertical campaign.

Status: Unvalidated by client

Energy & Utilities (Distributed Field Operations)

Solar/wind project developers, oil & gas service providers, and regional utilities have the logistics + manufacturing pattern doubled: distributed field crews, fleet cards, vendor invoicing in remote regions, and high CFDI exposure. Worth a vertical experiment after Q2.

Status: Unvalidated by client

Tech Enabled Enterprises (LatAm Scaleups)

Series B/C LatAm scaleups (Kavak, Cornershop alumni, fintech, healthtech) hire LatAm CFOs early, are SAP-less or migrating to Netsuite, and bleed cash on disconnected stacks of Mexican fintech cards + Excel. The pitch shifts to “we scale with you” rather than “replace your stack.”

Status: Unvalidated by client

Family Offices & Multi-Entity Holdings

Large Mexican family-owned holdings (5–20 operating companies) face cross-entity spend pain that Mendel's multi-entity architecture handles natively. Approach via the holding's Group CFO or Head of Family Office Operations.

Status: Unvalidated by client

Re-engagement of Old Clay Tables + HubSpot Inbound

On the onboarding call Alan flagged “old Clay tables we are not using anymore” and “lots of info in HubSpot.” Before sourcing brand-new lists, the targeting engine should ingest those tables, dedupe against current HubSpot, exclude churned/won/in-sequence, and prioritise the cleanest high-value remainder for the first re-engagement campaign.

Status: Confirmed in onboarding call – ready to action

LinkedIn Outbound (Heyreach) Layered with Email

Mendel's current outbound is email only (agency black box + freelancer SmartLead). CFOs, Controllers, Compliance, and Travel Managers all live actively on LinkedIn in LatAm. Adding Heyreach LinkedIn touches as the second channel – connection request → message → email re-engage – should lift positive reply rate and SQL volume materially.

Status: Recommended addition – not yet in scope

Gaps to Close in Strategy Call #2

- Vertical^{specific} named case studies with quantified outcomes (one per priority vertical).
- Detailed pricing per module (currently only ACV ranges – needed to write tighter ROI cold copy).
- Definition of "qualified meeting" – what passes Mendel's SQL bar today vs. what they want.
- Formal "do^{not} contact" list from existing agency + freelancer (action item from Apr 28 call).
- SmartLead access for review of past outbound performance and copy.
- Old Clay tables export for re^{engagement} campaign sourcing.
- Decision: include Argentina + Chile in V1 outbound or save for V2 (90% Mexico signal points to V2).
- Confirm outbound SLA – 100+ qualified meetings / Q goal split by vertical.

Conflict Notes

Geo focus: the BD Assessment lists Mexico, Chile, Argentina as core. The same document explicitly states *"90% of the focus should be in generating more revenue for Mexico"*. The playbook follows that priority – Argentina and Chile are in^{scope} only for the cross^{vertical} pharma and pro^{services} angles where the ICP is regional by definition.

Sector breadth: the BD Assessment positions Mendel as sector^{agnostic}. The playbook ranks five verticals based on existing logo evidence and conversion signals; the AI^{identified} opportunities section preserves the broader sector list (telecom, energy, tech^{enabled}) for future validation.
